

## THE WORLD OVER

### SPANISH ENVOY RESIGNS POST

WASHINGTON—The Spanish embassy announced Saturday that Ambassador Don Luis Calderon has resigned his post because his own beliefs were incompatible with those of the new government in Spain.

### L.A. GIROUX DIES IN ROCHESTER

ROCHESTER—L. A. Giroux, 51 Liberal member of the Alberta legislature for Grouard, died in hospital here Monday. The Edmonton lawyer had come here for treatment.

His wife and sister-in-law were here when he died. The body will be sent Tuesday to Edmonton for interment.

Mr. Giroux was born at West Farnham, Quebec. He was educated at Montreal College and at the Universities of Paris, France and Louvain, Belgium. He took post graduate courses in philosophy and economics at Louvain University.

### \$100,000,000 ISSUE PLANNED

OTTAWA—Finance Minister Charles Dunning announced Monday night a new \$100,000,000 issue of Dominion bonds will go on the market Thursday, subscription books opening at the Bank of Canada.

The loan will take the form of 4 and 12 years one per cent notes due March 14, 1941, offered at 98.75, to yield 1.40 per cent on maturity, and three per cent perpetual bonds callable after September 15, 1946, priced at 96.50 to yield 3.11 per cent.

Proceeds of the issue will be used for refunding Dominion obligations totalling \$73,168,200 and for general purposes of government.

The two maturing issues to be refunded are as follows: \$16,989,000 two per cent bonds due October 15, 1936 and \$56,179,200, five per cent bonds, due November 5, 1936.

### FEDERAL GOVERNMENT TAKES ACTION ON MINIMUM PRICE

Last week the Federal Government announced that a minimum price of 87½¢ a bushel, basis One Northern at five only when wheat prices drop below a bushel. Also that the Wheat Board would not accept deliveries from growers until wheat dropped below 87½¢ as aforementioned. It was stated that the policy was a tentative one and that a permanent policy would not be adopted until after the Turgeon commission inquiry into the wheat industry in Canada had been concluded.

### CARRYOVER TO BE HELD

It is understood that the Wheat Board is holding off selling of supplies still in its possession until the helping pressure of heavy primary deliveries and selling is eased. Information as to the volume is still in possession of the Wheat Board has been divulged, but it is suggested that it is about 50 million bushels.

## CARBON DISTRICT SCHOOL SPORTS WILL BE HELD ON FRIDAY, SEPTEMBER 18TH

The Carbon District School sports will be held in Carbon on Friday, September 18th and the following program of events has been outlined.

Parade—10 o'clock

Parade by schools—Prize for best school in parade. Prize for best dressed girl and best dressed boy.

Arrangement, formation, conduct, general appearance. Minimum of eight to a school to count in estimate of judges.

Track Events for Boys and Girls—Class A—15 and over; Class B—14 and under; Class C—12 and under; Class D—10 and under; Class E—8 and under.

Racing—

1/2 mile, boys open, 440 yards, A, B, C, boys and girls, 220 yards, B boys and A girls, 100 yards, D boys and girls, 35 yards, B boys and girls.

Jumping—

Standing broad, A, B, C, boys and girls. Running high, A, B, C, boys and girls. Hop, step and jump, A, B, C, boys and girls. Three trials each.

Field Vault—A and B boys.

Throwing Softball—A and B boys and girls.

Narrow Race—

D and E boys and girls. Wheelbarrow and Three Legged.

Softball and Baseball—

Softball tournament for mixed teams Grade VI and under.

Softball tournament for mixed teams Grades VII, VIII, and IX.

Hardball, boys open.

Two rural teams may unite to form teams.

Bring your own equipment.

Attendance of 60 days during year compulsory for competition.

Prizes for all events.

Prize send entries for team games to Bruce Ramsay on or before Sept. 17 in order that arrangements and draws can be made.

## K.C. ALLEN APPOINTED NEW GENERAL MANAGER OF THE ALTA. PACIFIC GRAIN CO.

Announcement was made today by Mr. H.E. Sellers, President of the Alberta Pacific Grain Company Ltd. that K.C. Allen had been appointed General Manager of the Company to succeed J.R. Murray, who formerly occupied that post, and is now Chief Commissioner of the Canadian Wheat Board. Mr. Allen was formerly Vice Manager of the Company. His headquarters will remain in Calgary. Mr. Allen is well known in grain circles in Winnipeg and Vancouver as well as throughout Alberta.

Buy Your Needs in Carbon!

## HARBELL BOYS TO STAGE DANCE ON SEPTEMBER 11

The baseball club will hold a dance in the Farmers' Exchange hall, Carbon, on Friday, September 11th. Jerry Fuller's Orchestra has been engaged to furnish the music and the boys promise all attending a good time.

You are urged to attend this dance and help the boys along. As an added attraction on Friday the Rockford and Carbon ball teams will play at the local diamond, the time to start about 5 p.m.

## LITTLE ITEMS OF LOCAL INTEREST

C. W. Gray spent the week end holiday visiting with his daughter in Calgary. He returned Tuesday morning.

Pat Poole and Ned Fuller went to Bowden district on Sunday, where they hope to secure work in the harvest fields.

Leo Trepanier, Richard Appleyard, Herb McCreedy, Jack Matthews, Babe Fuller, Harry Moody, and the Misses (in of 1941) in the Green Canyon, together with some of the local tennis players, were among those from Carbon taking in the dance at Drumheller on Monday night.

Frank Woods, Royal Hay, Jerry Picard, Daphne McKinnon and Oliver Finn were in the Drumheller dance on Monday.

Mr. and Mrs. Neil Cunningham and Albert Turville motored to Rimby on Saturday to visit with Mr. and Mrs. Joe Cunningham. They returned on Tuesday.

## FINANCIAL REPORT OF A. P. GRAIN COMPANY

Operations of the Alberta Pacific Grain Company Limited for the year ended June 30th last resulted in a loss of \$124,143.52 compared to a profit of \$4,012.13 for the previous year according to the financial statements made public today by H.E. Sellers, President of the Company. Bond interest of \$14,283.67 was met and \$551,323.25 added to depreciation reserves.

In view of the uncertainty of the outlook for the coming year on account of the poor harvest in Western Canada, necessity of considering further extension of suspension of sinking fund operations in connection with the Company's \$2,000,000 First Mortgage bond issue will be considered by the directors during the current year the report indicates.

The Alberta Pacific is one of the largest elevator companies operating in Canada. The company operates 371 grain elevators located throughout Saskatchewan and Alberta, and terminal elevators in Vancouver.

## ANGLIAN YOUNG PEOPLE HOLD PLEASANT MEETING

The A.Y.P.A. held a meeting in the basement of the Anglican church on Tuesday, September 8. Seventeen members were present.

The meeting opened with a prayer, followed by the reading of the minutes of the previous meeting. Several of the topics of the last meeting were reviewed and questions asked.

Volunteers took part in a debate were called for and two members responded. The two volunteers are to choose their partners for the debate and also to choose a subject to debate upon.

Short three-minute talks on such subjects as "General Stores," "Housekeeping," "Cooking" and "House" were given by each of the members present and some of those were very humorous. The meeting closed and lunch was served by the ladies present. After lunch, singing was enjoyed by all the members.

Tooth brush brushes come from Hong Kong and are imported principally from China, Russia and Japan. Before they can be used for dental hygiene, however, they are graded, washed, bleached and sterilized.

## FORTY THOUSAND BUSHELS SEED WHEAT WILL BE REQUIRED HERE NEXT YEAR

The regular monthly meeting of the Council of the Municipal District of Carbon No. 278 was held in the Municipal office, Carbon, on Tuesday, September 1st. The minutes of the previous meeting were read and adopted and general business entered into.

As the session of the legislature was in progress and no definite word had been received from the government regarding a road relief work program, it was decided that it may be necessary to call an emergency meeting of the council before the end of the month to draft plans for relief. (In the meantime the rice is away to Edmonton to see what can be done in the way of securing relief work in the Carbon municipality).

According to news received from the Field Crops Commissioner asking the amount of seed grain relief that would be required in the Carbon district next spring, and the following report was submitted:

40,000 bushels of seed wheat, which is available in the district 19,000 bushels of seed oats, not available in the district. It was pointed out that not more than 100 bushels of seed oats would be issued to any one farmer.

In a case of necessity feed oats or fuel oil will be supplied to needy resident farmers for an amount not to exceed \$50 per quarter of arable land.

Regarding the need of relief in the way of vegetables the council instructed the secretary to advise the government that if a reasonable amount of road relief work was provided that each individual could look after his own needs.

A communication was received from the department asking what requests for bridges would be made in 1937 and the Carbon municipality. The council submitted a request for a bridge on the district highway north and east of Carbon.

According to the new act the Deputy Reeve must be appointed every six months and Mr. J.R. McEwan received the appointment for the ensuing six months.

The Municipal District Inspector's report was received and discussed by the council, and it showed the affairs of the Municipality to be in excellent shape. The finances were excellent there being \$19,304 in the municipal account at the end of the year with \$500 outstanding. The municipal loss in 1935 was \$21,025 and collections were \$29,771. The school levy was \$12,445, and collections were \$18,045. In the opinion of the department this was a very high percentage of collections.

## FREE FLOCK APPROVAL AND BLOOD TEST SERVICE

As an encouragement to the poultry raisers in the Province of Alberta who undertake Record of Performance under Federal Jurisdiction, the Poultry branch of the Alberta Department of Agriculture, will provide free flock approval and blood-test service this year to all flocks entered and in good standing, in R. O. P.

Full particulars with respect to making entry in R.O.P. and details of the work, may be obtained from the Dominion Live Stock Branch, Department of Agriculture, Ottawa. As the period for receiving entries closes early in the fall, those interested are advised to act with as little delay as possible. G. M. Carmie, Poultry Commissioner, in making this announcement, points out that each year shows a decided increase in demand for R. O. P. stock and this is another reason why Alberta poultrymen can create additional markets for their products.

## UNITED GROWNERS DECLARE DIVIDEND

A dividend at the rate of three per cent has been declared by the Directors of the United Grain Growers Limited for the financial year ending July 31, 1936. Cheques will be mailed on September 15th 1936, to shareholders of record at the close of business July 31st.

## FROST DOES LITTLE DAMAGE

The first frosts of the season were prevalent in the district on Monday and Tuesday nights when falling showed signs of withering under the morning sun. In view of the fact that there were no gardens of much account following summer hail storms the frost damage was light and the grain has all been cut so there will be no damage to wheat crops.

The weather is quite cool and from all indications snow must have fallen in the far north.

## ADAM BERTSCH PASSES AFTER SHORT ILLNESS

It was learned just before going to press on Wednesday that Adam Bertsch, agent of the Alberta Pacific Elevator at Carbon, had passed away at five o'clock in the morning.

The late Adam Bertsch has been ailing in health for some time. He has been a resident of the district for a number of years, having farmed seven miles south of Carbon, until about five years ago when he moved into town with his family and took charge of the local grain stock of the Alberta Pacific Grain Company, a position which he held up until the time of his death.

The late Adam Bertsch was born in Eureka, South Dakota 43 years ago and leaves to mourn his loss a sorrowing wife and three children. Also five brothers, Albert, Chris, Jacob, Emanuel and Robert. Four sisters, Ella, Hilda, Tillie and Mrs. R. Neuhauer also survive, as well as his father, C.J. Bertsch of the Carbon district.

Winter Bros. Funeral Home of Drumheller are in charge of funeral arrangements.

## LONG YEARS AGO

About seventy five of the citizens of town and country assembled in The Farmers' Exchange Hall on Monday evening to tender a farewell supper to Mr. and Mrs. Harry Evans on the eve of their departure for Dunsford.

Ducks are plentiful this year and so are hunters. Many Carbon citizens came last Wednesday morning, and came home well-satisfied with birds.

The harvest is well advanced in this district, and several threshing outfits have commenced operations. The wheat will all nearly grade No. 1 hard.

A very quiet wedding was solemnized in Calgary, on Wednesday, Sept. 1, 1936, when Miss Ida Burnett, of Lonsing, Michigan was united in marriage to Mr. Wellington Leitch, of Carbon.

## MISS ANNIE LEMAY STARS IN TENNIS TOURNAMENT AT DRUMHELLER ON WEEKEND

Miss Annie Lemay, the 15-year-old tennis player from Carbon, made a wonderful showing in the Drumheller Open Tennis Tournament held on September 6th and 7th. In the District Singles she defeated three strong senior players to reach the final, in the first round she defeated Miss P. Nicol of Calgary, Miss O'Neill of Drumheller in the second round, and Miss Kay Swallow of Edmonton in the semi-finals. Miss Swallow is the Alberta University Champion so Annie was up against strong opposition. She also beat Miss Swallow in the open singles.

Annie now has to meet Miss L. Lannon of Drumheller in the final which will be decided last night. Miss Lemay also paired with Miss Nicol in the Ladies' Doubles and they are in the semi-final of that event against defeated Miss Cameron and Miss Cameron of Drumheller in the quarter finals. Annie also competed in the Mixed Doubles with J.C. Spencer as partner. They defeated Sloan and Brown of Rosedale in the second round, having drawn a bye in the first round. They then defeated Mr. and Mrs. Borge of Trochu in the third round, and lost in the semi-final to Ernie Anderson and Miss Peggy Nicol of Calgary.

The other players from Carbon competing in the tournament were W.L. Oxson, Cyril Coxon, and Francis Coxon. Francis defeated H. Boach of Hanna in the first round and lost to Ernie Anderson of Calgary in the next. He made an exceptionally good showing against this experienced player.

There was a heavy entry at the Drumheller tournament this year, and players came from Claresholm, Carbon, Hanna, High River, Milo, Rosedale, Rosbush, Stettler, Calgary, Edmonton, Trochu, as well as Drumheller.

## PROTEST MINIMUM PRICE (Calgary Herald)

Directors of the Alberta Wheat Pool, meeting in Calgary for their regular monthly session passed a resolution protesting against the fixed minimum and also the enactment which prevents the wheat board accepting deliveries until the price level is below 87 cents a bushel.

In the words of the resolution: "The ruling was considered tantamount to ordering wheat growers to leave the wheat in the ground, from fulfilling the functions for which it was formed."

The Pool board expressed the opinion that the following government in its action failed to consider its pre-election promise to market wheat at world levels and return to the growers in Canada a price commensurate with the cost of production.

## Why Not a New Radio?

With longer fall evenings the radio programs are again in demand and appreciated. Enjoy these programs and radio features with a new radio. The new sets are far superior to the old makes in tone and pick-up. You will be delighted with the reception. CALL IN AND SEE THEM ASK FOR A DEMONSTRATION

### The Need For Flexible Loans

More elasticity is needed in mortgage loan agreements covering security in Western Canada in future than has been provided for in the past.

In future agreements some recognition should be taken of the possibility of the intervention of Providence in the affairs and operations of the mortgagor resulting in complete or partial inability to meet maturing annual payments of principal and interest due to no fault of his own.

Experiences of the past few years of general economic and agricultural depression have demonstrated that the terms under which loans have been made in the past have been based on the false premise that the farmer is in receipt of an assured and steady income, such as, at least in theory, is enjoyed by the salaried man.

Such agreements provide for the payment on a specified date each year of a portion of principal and one year's interest on the loan, without any provision for postponement of either principal or interest in the event of crop failure which may ensue from any one of a number of causes over which the mortgagor has no control whatsoever.

The conditions under which agriculture has labored in Western Canada during the past five or six years, resulting in the piling up of mortgage indebtedness and now necessitating debt adjustment on a wide scale, have amply demonstrated the futility of agreements which make no provision for a measure of relief in periods of total or partial crop failure.

There is no doubt that much of the work and expense of debt adjustment now in progress could have been avoided had agreements, under which these debts have been granted, even to the extent in some cases of wiping out the mortgagor's equity, been drafted when the original loans were made, to provide for automatic reduction in the amount of repayments in years in which, because of the operation of natural forces, the mortgagor had little or no income and for an increase in payments in years of bounty, when much of the indebtedness would have been repaid.

Not only would such modifications with regard to loan companies and the work of debt adjustment tribunals have been materially lessened, but the debtor would have been saved years of mental torture and harassing anxiety as he watched a juggernaut of accumulating interest threatening to crush him and pictured the arrival of the day when he and his would be disappointed of all they ever owned.

A form of agreement that would eliminate this dread which must necessarily haunt the days and nights of the honest debtor who does his best to meet his obligations and is only defeated because of circumstances over which he has no control, would be a godsend to all who have occasion to secure loans in the future.

It should be possible to draw up an agreement that will provide for repayment of principal sums in accordance with the ability of the mortgagor to pay based on actual returns from honest effort and yet, at the same time, protect the lender from loss due to human incapacity or the machinations of dishonesty.

It is interesting to note that agreements incorporating the principle of paying more in times of plenty and less in times of dearth have been adopted and put into effect with apparent success in Australia, where in certain sections of the country the sheep ranchers are subjected to severe drought ravages to the extent at times of wiping out whole flocks. In that country the same principle has been made to apply also to short term credits supplied by the banks.

If such a policy can be worked out successfully in Australia there appears to be no reason why it should not operate equally well in Western Canada.

It is to be hoped that some arrangement for greater elasticity in future loan terms can be made by members of debt adjustment tribunals who are in frequent requisition with the loan companies at the present time.

That the necessity for something of the kind exists was referred to recently in an address by P. G. Roush, chairman of the Saskatchewan municipal debt adjustment organization, when he said: "I find there has been a rigidity in our system of making loans to farmers that has not sufficiently taken into consideration the wide fluctuations in revenue to the farmer between years of plenty and years of scarcity. Provision should be made for greater flexibility."

The fact that at least some authorities have come to this conclusion strikes a hopeful note that something more commensurate with Western conditions will be arranged for in the future.

### Liquid Air As Fuel

#### Newest Energy For Motors Being Tested In Japan

Liquid air serves as fuel for one of the strangest motors ever built, which now is operating in a Japanese laboratory. It should fulfill the hopes of its inventor, it may bring about a revolution in motive power for vehicles of the land, sea and air. In contrast with the fiery temperatures of a conventional internal-combustion engine, which it somewhat resembles, the new motor operates at temperatures from 250 to 350 degrees below zero. Its small fuel tank holds ordinary air that has been chilled until it is transformed from a gas into a liquid like water. The difference in temperature between this extraordinary fuel and the surrounding atmosphere provides the energy to run the motor. From the fuel tank, the liquid air passes into a chamber where it is allowed to absorb heat from the exterior air. In doing so, it turns to vapor, much as water turns to steam when heated in a boiler. The pressure of the expanding air drives pistons in a pair of cylinders. Through an elaborate system of auxiliary apparatus, virtually all the energy contained in the liquid air is reported to be recovered. Because of its efficiency and small bulk of fuel required the inventor foresees eventual application of his motor in automobiles, trains, ships, and especially in airplanes. The small bulk of fuel required would also be an important advantage in aircraft. — Popular Science.

### Long-Distance Phoning

#### Australia Claims To Have Most

Costly Long-Distance Calls In the World

Due to the distance from other centers of civilization, Australia is confident it has more long-distance telephone calls than any other country in the world.

A report of postal authorities, who are in charge of long-distance telephone calls, shows a few million in the past year to be as follows:

A call of 10,000 miles from Sydney to Valparaiso, via London and Buenos Aires, with perfect reception. Frequent calls from Sydney to London, San Francisco and to South Africa.

One call from Los Angeles to Sydney that occupied 55 minutes and cost \$100.00. The longest long-distance call ever made into Australia. At regular rates it would have cost \$100.00.

A conference call from London to Australia that embraced Johannesburg, Bombay, Sydney, Melbourne, Adelaide and Perth, with everyone participating talked and heard each other as easily as though they were sitting around a conference table.

Since the radio-telephone service was inaugurated there have been 7,000 calls from Australia, and the outside world as far as Chile, the Saar, Finland, Hungary and Palestine.

The latest hookup in the long-distance telephone network has been with Tasmania.

### New Test Of Death

#### Will Avoid All Possibilities Of A Premature Burial

A new test of death, discovered by Drs. Salisbury and Melvin of Queen's University, Kingston, Ont., is described in the British Medical Journal.

The general application of this test would remove all traces of one of the most haunting fears of mankind—the chance of premature burial.

The test involves appearance of the eye. All that is necessary is an ophthalmoscope, an instrument for inspecting the retina. If a drop of blood in the retina vessels are broken the patient is beyond resurrection. This phenomenon takes place after the circulation has been stopped for about ten minutes.

### No Wonder It Hurts

The tail of the cat is part of the backbone, or spine, which is made up of a number of little bones of bone joined together, just like our spine; and pussy's spine also is joined to her brain. You will understand now why pussy cannot bear to have her tail pulled and why she growls and scratches when the baby drags it at it. No wonder for it affects her spine, and half maddens her for a minute. — Our Dumb Animals.

### Unique Shoe Shop

A department has been opened in St. Louis by the Child Conservation Conference, where persons using only one shoe, because of the loss of a foot or injury, may exchange shoes with persons not having the use of the opposite foot.

Highway tolls were once paid with cash, but now with blood.

### Cable-Cars Are Out

#### Japanese Do Not Want Mount Fuji's Beauty Marred

Majestic Mount Fuji has escaped another effort at modernization and climbers who want to get to the top will have to continue doing it on foot. A proposal for a cable-car route to the summit has been rejected.

The Japanese Home Office, opposing the project, declared that such a railroad would mar the beauty of the mountain and have an adverse effect on Japan's national health.

The reasoning behind the record idea was that a railway would induce wiliness and deprive many climbers of the healthful exercise necessitated by the climb.

One report was that a series of anonymous threats had been made to bomb a railway if one were built. The newspaper Jiji understood the threat, but the Japanese Home Office declined to see extent.

Yji, noted for its perfect formation, is 12,467 feet in height. Nearly 100,000 persons climb it annually.

## WAKE UP YOUR LIVER BILE—

And You'll Jump Out of Bed in the Morning Ready to Go

The liver should pour out two quarts of bile every twenty-four hours. If it does not, you are sure to feel tired, sluggish, and nervous. You get constipated, headache, indigestion, and a general feeling of uneasiness. You are sure to feel tired, sluggish, and nervous. You get constipated, headache, indigestion, and a general feeling of uneasiness.

Home-Made False Teeth

Molar Made From Metal Crank Case Of A Motorcycle

False teeth made from an old motorcycle crank case are the crowning climax of a life of dental experimentation by Albert Orwin, road worker living in the village of Jump, near Wombwell, Eng.

First Orwin tried his legumity on the knuckle bone of a leg of mutton but the bone was not big enough.

Then he tried using a billiard ball which, however, had the same defect the diameter being only two and a half inches.

Success came when he melted down the aluminum from the crank case of the old motorcycle. The melted aluminum was run into an "impression" which he had taken himself.

Even so, this set is only for everyday use.

On Sundays his smile reveals a "perfect" set made from the motorcycle screw tops of old thornos flasks.

### Centipede To Blame

#### Caused Breakdown At Electric Power Station In India

Peshawar City, on the North-West Frontier, India, was thrown into complete darkness by a centipede. For three successive evenings the city lights failed. On each occasion a breakdown occurred at the electric power station, but experts could not detect the cause. All their investigations—even to a rapid inspection of underground cables—failed to explain the mystery. Then on the fourth night, a linesman found a centipede on the wires which carry the electric current to the city. A number of its legs were sliced. This was taken as sufficient evidence of its previous expeditions.

### Special Prize

A special prize of \$25 will be awarded for the best finished Hereford steer at the Saskatoon and Regina spring fairs in 1937.

The only safe rule is to quit driving for a spell when drowsiness begins to steal away one's alert attention to the full and efficient control of the car.

## MOTHER SAVED THE DAY...

### Find Thriving City

#### British Government Official Sees The Settlement While Flying

The lost city of Yong Peng, inhabited by 5,000 Chinese and situated in the midst of the Malaysian jungle, was found by a British government official while flying over the district.

The official, who was employed in the Land Office of the native Malay state of Johore, saw a large settlement in the heart of the jungle which he did not recognize. Next day he drove to it, and to his amazement discovered that it was the lost city of Yong Peng.

The government was unaware of the existence of the town, although it has been a thriving agricultural centre for nearly ten years.

The inhabitants, who are Chinese, work as rubber planters on an area of more than 10,000 acres. They have built the town at their headquarters, and provided it with all the amenities of a native civilization.

### SELECTED RECIPES

#### DATE SHORTBREAD

(Mixture 1)

- 1 package dates (stoned)
- 1 cup boiling water

Method: Boil together until soft. When cool, add 1 teaspoon vinegar or lemon juice.

(Mixture 2)

- 1 cup shortening
- 3 cups Purity Rolled Oats
- 2 cups Purity Flour
- 1 teaspoon salt
- 1 teaspoon soda

Method: Stir flour with salt and soda, add Purity Oats and cut in shortening.

Divide Mixture 2 into equal parts. Place half of it in cold baking pan. Spread mixture 1 over this, and then spread remainder of Mixture 2 over date layer in sandwich-like fashion. Bake in slow oven of 300 degrees for 40 minutes.

### Horns Must Be Approved

#### Soft Tone Essential For Cars In Buenos Aires

The city of Buenos Aires, according to a report, will refuse to license automobiles unless the sound of their horns is approved as mellow and soothing.

The regulation provides that "all motor vehicles should be provided with horns of a single soft tone, to be determined by the executive department. The use of 'Klaxon' horns, loud-sounding sharp and double or triple-tone horns is strictly prohibited."

### Interested In Alaska

Dan Skuse has returned to Juneau, Alaska, and declared he was stopped by every traffic cop on Broadway and Fifth Avenue, New York, but not for infractions. The policemen spotted him as a man who was permitted to learn something about the territory.

### New Centre Of Civilization

#### Future Development Of World Opportunity Lies Along Pacific Coast

Opportunity for advancement in the world today lies in the Pacific area. Dr. De la Hoz, President of the University of Southern California, has been telling audiences lately.

"The European civilization is a dying one today," declares Dr. Pizozoles, "while the new world, vital, progressive and dynamic, lies along the Pacific."

The future development of world opportunity lies, he believes, with the reawakening of Japan, China and Russia.

"While the various political movements in the Far East," says Dr. Pizozoles, "may not be to our liking, yet because of those movements one-half of the world's population is awakening to the future. With this awakening, the opportunity for business and cultural development of American institutions will be unlimited."

"Competition from European nations in the Far East," says Dr. Pizozoles, "may not be to our liking, yet because the European nations are too interested in their petty 'international backyard fights' to see what they are missing in the way of truly world development."

### Forgotten Eskimo People

#### Government Scientist Trying To Find Traces Of Early Civilization

A new attempt to find traces of a forgotten Eskimo civilization in the Eastern Arctic will be made by a Canadian government scientist who has sailed for the Arctic aboard the Hudson Bay's sturdy supply ship, Nascope.

Discoveries of bone and ivory implements bearing no resemblance to those used by present-day Eskimos has led scientists to believe that the Eastern Arctic once was inhabited by a strange race, now extinct.

Douglas Leechman, a National Museum anthropologist, will spend several weeks exploring old village sites on the Buxto Islands, on the eastern tip of the Ungava Peninsula, in an effort to find some clue to the date and origin of the ancient race.

### Disguises Forbidden

#### Britain's Regulations In Singapore Are Very Severe

If you, madam, are a synthetic platinum blonde, or if you, sir, hide your bald head under a wig—sterile clean of Singapore.

A new official secrets act decrees that all disguises, including dyed hair and wigs, are forbidden. Wigmakers are liable to be arrested as spies, so stringent are the regulations in Britain's Gibraltar of the East.

Japanese scientists are disappointed because Russia will permit only two of them to enter the country to view the recent eclipse.

### Cannot Be Calculated

Amount of Happiness You Can  
Produce By Smiling  
Be cheerful! Whichever you de-  
sire, and make others happy, or be  
drummed, and make everyone around  
you miserable? The amount of hap-  
piness you can produce is incalculable  
if you show a smiling face and give  
pleasant words. There is no  
joy like that which gives you a  
kind act or pleasant deed, and you  
may feel it at night when you rest,  
and at morning when you rise, and  
through all the day when about your  
business.

The British postoffice handles more  
than six billion letters and parcels  
annually.

THE FAMOUS  
RUBBING  
LINIMENT  
Rub on—pain gone.

size.

MINARD'S  
"KING OF PAIN"  
LINIMENT

emotion. But another word of bit-  
terness ate in, creeping along, linger-  
ing, making itself at home.

Yet in spite of it she found herself  
considering the offer. This was not  
the same thing she had been up  
against at the employment agency.  
It was quite another matter. No  
lascivious old beast who wanted to  
employ you in the guise of secretary  
who wanted you to "be nice to him."  
This man—he represented so much  
of all she had looked upon from afar.  
He was her own kind. He re-  
spected—glamour.

Her hitherto well catalogued  
thoughts on one subject shifted to  
a vortex, spun to a centre. Other  
girls—Girls did sell themselves for  
less than six months of life. Every  
day. They thought nothing of it.  
Why not she, who had so little to  
lose, so much to gain? This stranger,  
this New York Arabias Night's  
"Hassan" who had materialized  
merely at a tumultuous wish, was  
offering her everything—the wanted  
so desperately—except true love, of  
course. And that she dared not  
accept from a girl, even though it  
should be offered.

Her voice was brittle as her head  
littered with the imperiousness of one  
of those ancient princesses she re-  
sembled.

"And the price?"  
"It is sounded suddenly away from  
her.

As quickly he moved a bit back  
from her.  
"You mustn't misunderstand  
me," he glanced quickly at her, then  
away, but in one quick glance,  
decided not to make the bald state-  
ment he had intended. He put it in  
a mild way. "I—er—I assure you  
I'll not attempt to infer myself upon  
you in any—unpleasant way. It's  
a business proposition—merely. You  
will be on a salary. You see, it will  
work out like this: All times when  
you are playing, as say you want to  
play, you will actually be working  
for me."

"Let's say, then," said Starr  
softly.  
"Have it your own way," said the  
man, carelessly. "I make you two,  
and you can take it or leave it."

Starr wanted to study him, did not  
dare. But catching a slanting  
glance of his eyes, she was instanta-  
ly ashamed of her suspicions. What-  
ever this man was, this "Hassan" of  
broadsheet, he wasn't that kind.

He wasn't the kind who picked up  
girls on the street or accented them  
in cafes merely because they were  
alone. He didn't have to. He had  
that indefinable charm which is  
irresistible to the opposite sex.  
Hassan felt it herself; what his name  
were dancing—all the time before  
and after? Starr made a mental  
note that her "Hassan" was kept  
many a debutante sitting by her tele-  
phone, drumming her polished finger  
nails, waiting for his call.

He was well, there plenty to be  
who hovered obnoxiously near. His  
eyes were on Starr. There seemed to  
be a dot in his countenance, for  
all he had said.

"I've got to go down to my town,"  
said Starr, her place to say to him.  
"How about us getting  
here—my place isn't far away—  
we can have a bit of supper there,  
and—well, there plenty to be  
about..."

He did not answer, for there was  
no answer. She was conscious only  
of the soft clatter of clinking glasses  
in the place, the muted clamor of  
traffic outside, the unreality of  
everything as she picked up her  
purse, alighting a little, feeling much  
in a daze as she felt him take her  
arm and guide her toward the door  
as though she had no will of her  
own.

She made only one remark when  
he settled her in the taxi. She said:  
"I'm afraid I won't be a very good  
companion tonight. I'll have a  
grouch when you dropped by. I—feel  
just like that."

"Don't let me interfere with any of  
your childish pleasures," he said,  
and laughed. "I'll be glad to see  
your little heart desires. I've even  
got a lot of ex-Christmas presents  
at home just as you try to buy them.  
And the pleasure will be all mine."

### CHAPTER V.

Starr did not see the calculating  
glance Fairbourne gave her in the  
darkness of the taxi. If there had  
been any lingering doubts in his  
mind, this simple acquiescence to  
going with him wherever he led him-  
self, that was all. His conscience was  
clear. And why not, he argued to  
himself, seeing where he had at last  
caught up with her? She might have  
her own rack, but at least she was  
new enough at it for it not to stick  
out too plainly, and he could mold  
her to his own wishes.

They got out before the low door-  
way of an old-fashioned house on  
the corner. Starr saw the  
those obviously made into bachelor  
apartments of the smarter class. He  
led her through the doorway lighted

## WILSON'S

FLY PADS

### REALLY KILL

One pad kills flies all day and every  
day for 2 or 3 weeks. 3 pads in each  
box, no spraying, no sticky, no  
no odor. Ask your Druggist,  
or mail order at home.

10 CENTS PER PACKET  
WHY PAY MORE?  
THE WILSON FLY PAD CO., Hamilton, Ont.

by the two pierced from lanterns that  
beckoned a welcome. The ivory and  
the plump comfort of the entrance  
enveloped them and the small auto-  
matic elevator led them out before a  
door painted ivory and with a brass  
knocker. He didn't use it; rapped  
with his knuckles at the door.

A Japanese serving man opened  
the door and they went through to a  
hallway, all dark woodwork and the  
red walls to a big living room where  
a fire burned on the hearth where  
one had been a grate.

"This is well enough for a bachelor,"  
he said, with a touch of dis-  
dain. "I wish an Egyptian prince  
could make here at home."

### Sure Of A Welcome

United States Has Warm Affection  
For King Edward

Every good Canadian will echo  
the words of President  
Roosevelt in Quebec—"We look  
forward to the day when, finding it  
possible to continue the great  
friendship (King Edward) was  
born, he (King Edward) may also  
visit with his neighbors in the United  
States. When his visit is announced,  
he will be received." The visit  
would make any similar event in his  
history seem a tame thing and that  
of more than a hundred past  
matches, cup races and naval and  
aeromarine conferences to promote a  
better mutual understanding. This  
is an abiding admiration here for  
English institutions and a warm  
affection for the King and Queen  
which would welcome an opportunity  
to display them. Inasmuch as the  
young King has not hesitated to de-  
scend from precedents and to make  
some of his own, an acceptance of  
the President's indirect invitation  
would not be surprising.

It is nothing new for a President  
to leave his native land. President  
Wilson went to Europe twice. Pres-  
ident Harding to Vancouver, and  
President Coolidge to Cuba. But no  
King of England has ever set foot  
in the United States—Boston Her-  
ald.

### Rare Autograph Volume

Contains Letters Written By Famous  
Men In Last Century  
A rare volume of autographs, let-  
ters written by kings, scientists,  
authors and statesmen of Italy,  
France and England, between 1600  
and 1800, has been discovered in the  
Museum of Kiev.

Starr did not fail to contain au-  
tographs and letters of Voltaire,  
Descartes, Moliere, Cardinal Richelieu,  
Philip II of Spain, and Beau-  
marquis, among others. It was  
published in Paris at the beginning  
of the Nineteenth Century.  
The material for the book, of  
which the Kiev copy is believed to be  
the only one in existence, is stated  
to have been gathered from the  
archives and libraries of over sixty  
European countries.

While the outside temperature  
stood at 103 degrees, a drinking  
fountain in the post office at Findlay,  
Ont., was broken down. The  
said the mechanism had gone "hay-  
wire."

### Wants To Write Book

Young Railway Porter Hopes To  
Return To West Indies

To Emerson S. Mahon, portering to  
be a means to an end. The colored  
observation-car attendant on the  
Canadian Pacific Railway's train  
that runs from Winnipeg to Edmon-  
ton, hopes, some day, to return to his  
native West Indies and there to  
write a book.

Mahon would like to tell the world  
of the ancient customs and practices  
of the West Indies, particularly of  
those on the Isle of Grenada, where  
he was born and from where he came  
to Canada 24 years ago. He intends,  
some day, to dig deep into the cen-  
turies-old lore of the people in that  
group of islands in the Caribbean  
Sea.

But before doing that the smiling  
porter wants to progress further in  
his study of the Hebrew religion.  
Mahon is an ordained Rabbi. He  
holds three degrees in the ancient  
Jewish faith. His ambition is to at-  
tend a Hebrew seminar in Great  
Britain to obtain the highest degree  
in the religion, that of Rabi, or chief  
rabbi.

Mahon's home is in Winnipeg.  
Four months a week he is in the  
road, the other three being spent in  
the Manitoba capital, where he  
preaches his faith. He explained  
there are seven degrees of rabbi. He  
is authorized to practice three of  
them and must continue his seminary  
studies to obtain the remaining four.

The young porter explained that  
Hebrew is not at all an uncommon  
language in Winnipeg. He said, he  
said, had his beginning in the  
West Indies in 1902. In that year,  
he related, Jews were expelled from  
the West Indies, many of them  
born a year before slaves were freed.  
His religion was Hebrew, as was  
that of his "master." That has been  
the religion of his family ever since  
—Lethbridge Herald.

### British Empire In Tears

Artist Spends Ten Years Painting  
Story On Plywood

A little woman with an idea 100  
years long and 75 feet high has  
arrived in Fargo to show that she  
can sell it.

She is Clara Largo Thomas, noted  
American artist, and the idea, which  
she has been ten years perfecting, is  
a story of the British empire in tears—  
the British empire in ships—its  
history, painted on plywood, in the  
fiftieth century, and finishing with  
the Queen's story.

"Since childhood plays has fasci-  
nated me," Mrs. Thomas declared  
she has hunted museum and  
searched records to get all details  
accurate."

She is a professional career started  
when, owing her dreamer mother,  
she offered to paint her furniture.  
By the time she had finished the dreamer  
owed her money.

While in London, Mrs. Thomas was  
using the studio of Sir John Lavery,  
famous painter.

### Pencils From Japan

Laid Out At Less Than Cost Of  
Raw Materials

Imports of pencils into Canada  
from Japan in May of this year were  
about equal to estimated domestic  
production for the same months, and  
were almost as great as total im-  
ports from Japan for the whole year  
1935, says Bookkeeper and Stationer,  
Toronto. The average price of these  
imports was placed at approximately  
24 cents per gross, compared with the  
valuation of 1935 imports of 58  
cents per gross and 61 cents per  
gross in 1934. The laid-out pencils  
declared on Japanese pencils in Cana-  
dian ports of entry is said in many  
places to be actually lower than  
the cost of the raw materials that  
went into them.

### Hard On Teachers

The bureau of education has ruled  
that school teachers in Greater  
Shanghai could not use rouge,  
lipstick, face powder or permanent  
waves, as they were "incompatible  
with educational principles." Similar  
prohibitions previously applied to  
girl students.

Gold Production  
Production of gold from Sakka-  
chewan and Manitoba sources during  
June was recorded at 10,000 ounces,  
while the total for the first six  
months of 1936 was 57,841 ounces as  
compared to 75,007 ounces in the  
same period of last year.

The people who drive the fastest  
usually have the least to do after  
they get wherever they're going—if  
they get there. 2168

## BACK-ACHE

### Little Help For This Week

A soft answer turneth away wrath,  
but grievous words stir up anger.  
Proverbs 15:1.

Renew Thy Image, Lord in me,  
Lovely and gentle may I be,  
And like this book one of your  
dear!

No anger mayest Thou ever find,  
In spite of my ungrateful mind,  
But faith and heaven-born peace  
shall be my friend.

Neither say or do ought displeasing  
to thy neighbor; and if thou  
new international intrigue are proved  
against him, and can never be-  
lieve it. Therefore commit yourself  
not in both, and enjoy the present.

### Man Without A Country

Former Russian Leader May Be  
Forced To Leave Norway

Indications are that Leon Trotsky,  
former Russian revolutionary leader,  
might soon be returned to his usual  
status of a man without a country.  
Norway, which has been a refuge  
to be expelled from Norway. Gov-  
ernment sources said, if charges of  
new international intrigue are proved  
against him, and can never be-  
lieve it. Therefore commit yourself  
not in both, and enjoy the present.

Trotsky entered Norway June 18,  
1935.

Britain Using Aids  
In spite of the reduction in parcel  
post rates, Britain's postal services  
had a profit of £11,250,000 in the  
year. Telephone services operated by  
the British post office, had a record  
income. It is another sign of the  
way Britain is going ahead.

### Greatly In Demand

Marguerite Sallie, artist's model,  
says she is the most painted woman  
in the world. She estimates that in  
the nine years she has posed for  
artists, she has been painted or  
sketched 5,000 times.

It is questionable whether the saw-  
tooth is as much a nuisance to Cana-  
dian forests as the sawmill.

According to a trade journal there  
is a distinct boom in new cars. And  
usually a distinct rattle in old ones.

Editor and Publisher

## THE SKATING RINK

Now is the accepted time—you've heard that phrase before, but too often have let it pass without giving the subject referred to sufficient thought. However, give the following a little of your time now and the community a little of your physical effort in the very near future.

Carbon must have a skating rink this winter—and the rink must be prepared before freeze-up.

A good well has been constructed in the park near the creek and most of you will agree that where there is water, that is the proper place for a rink.

It is evident then that the old rink has to be moved to a new location in the park near the well.

There will be no funds available this year for the moving of the rink fence, but we will all have a little time to spare to give to community purposes.

We suggest that a meeting be called to discuss the matter and make all arrangements for a "bo" to move the rink fence and put the rink in shape for a skating rink before freeze-up.

When such a meeting is called, citizens and parents bearing in mind the lack of sports in Carbon last winter should turn out and support the venture, and when the work is to be done, not shrink at a public duty.

## UNITED GRAIN GROWERS

A dividend at the rate of three per cent has been declared on the paid-up capital stock of United Grain Growers Limited for the financial year ending July 31, 1936.

Cheques will be mailed on September 15, 1936, to shareholders on record at the close of business, July 31.

By order of the Board of Directors.  
R. S. LAW,  
President.

Winnipeg, Manitoba,  
August 22, 1936.

## GRAIN TRADE AND MINIMUM PRICE

The Western Producer in its issue of September 3rd, referring to the decision of the government in regard to the minimum price for wheat and its reception by Western farmers, says:

"To them and to many of those whom they elected it must have come as a cruel disillusionment to find that their government chose to listen to and be guided by the grain trade and other reactionary elements in their midst while refusing even to acknowledge the submissions of organized agriculture."

The implication that the grain trade or any section of it has at any time made representations to the Government or to the Canadian Wheat Board, or has tendered advice to those bodies, relative to the establishment of the minimum price for wheat at 87½ cents per bushel or any other figure, is absolutely false.

The interests of wheat producers and of the grain trade are identical in regard to grain prices. The prosperity of the grain trade in Canada is bound up with the prosperity of producers. It has no interest in keeping prices down. The figure of which the minimum price should be set is a matter to be decided by the Government having in view the loss which it might be prepared to sustain in the event of a decline in world wheat values. The grain trade has repeatedly stated its belief that producers must be assisted to overcome the adverse conditions resulting from drought and excessively low prices. But it has been opposed to attempts to fix the price at which Canadian grain should be offered in the export markets or to hold Canadian wheat at prices above its relative value in world markets because such attempts must result in (a) loss of markets and diminution of sales, (b) the creation of burdensome surpluses, (c) eventual loss both to producers and taxpayers, and (d) encouragement of uneconomic and highest production by our competitors.

In the continuation of the open market for grain and the preservation of every available channel through which Canadian grain can be sold are to be found a guarantee of the best returns to Canadian producers. To maintain such returns is as much the desire and interest of the grain trade as of the producers themselves.

There is room for honest difference of opinion as to what the minimum price should be. But there is no justification for false imputations of motive and act.
